Hazardous Weather

Day 1 Weather Hazards

Valid: 0800 Wed - 0800 Thu

Locally heavy rain with isolated flash flooding in NM, especially in/near burn scar locations

A few strong to severe storms possible

Flash flood threat

-  Very Common – Happens Often
-  Common – Happens Frequently
-  Uncommon – A Few Times a Year
-  Rare – Once Every 1-5 Years
-  Very Rare – Once Every 5-10 Years

*Threat levels are based on FEMA Region 6 criteria. State or local threat level criteria may differ.

Hazardous Weather

Day 2-3 Weather Hazards

Valid: 0800 Thu - 0800 Sat

Areas of flash flooding possible Thursday especially in/near burn scar locations

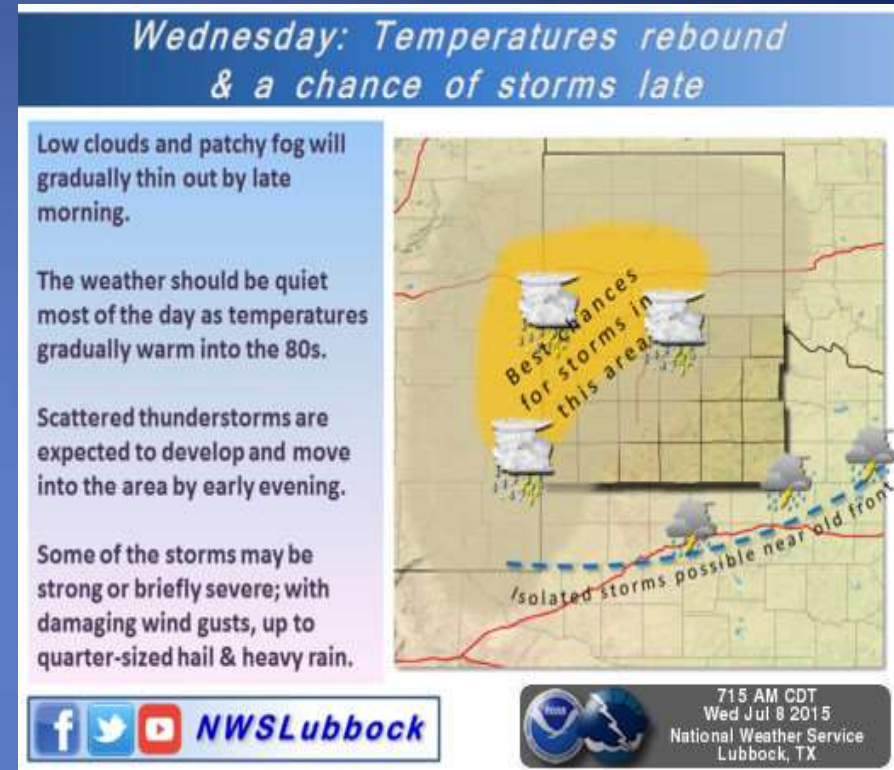

*Threat levels are based on FEMA Region 6 criteria. State or local threat level criteria may differ.

Hazardous Weather

Southeast to southwest winds will sustain the inflow of moist unstable air into southern New Mexico and west Texas and this will again generate mainly afternoon and evening showers and thunderstorms over much of the region. A few storms may produce very heavy rainfalls...damaging wind gusts and hail. Skies will be partly to mostly cloudy and high temperatures will be in the lower and middle 90s lowlands with 70s and 80s mountains.

Temperatures will warm up today but will still be well below normal with highs in the lower to middle 80s. Late in the day, scattered t- storms will move into northern and western portions of the area. A few storms may persist into the night.

Hazardous Weather

Scattered to numerous showers and thunderstorms are expected for the afternoon in the western panhandles with more evening and overnight activity further east. Some storms will be strong producing gusty winds to 50 mph, small hail and locally heavy rainfall. There is low potential for a few severe storms producing large hail and damaging winds and can not rule out an isolated tornado as well. Rain chances will be highest in northern areas and lowest in the southeast Texas Panhandle.

A band of rain and a few storms will continue to move northeast along a stationary cold front. 1 to 3 inches of rain is likely in this area with some flooding possible. If it is raining in your location right now, it will continue for a few more hours. Rain will develop in the scalloped area later this morning across the Red River valley region. Mainly dry weather will prevail today south and southeast of the DFW metroplex. The DFW metroplex will probably stay right on the edge of the rain, with western Tarrant county seeing good chances of rain while eastern Dallas county will see only a slight chance.

Hazardous Weather

Mostly cloudy this morning becoming partly cloudy and breezy this afternoon. Hazy with highs in the upper 80s to mid 90s. A few showers and storms are possible across the northern Hill Country and northern Rio Grande.

Weather Warning/Advisories Issued

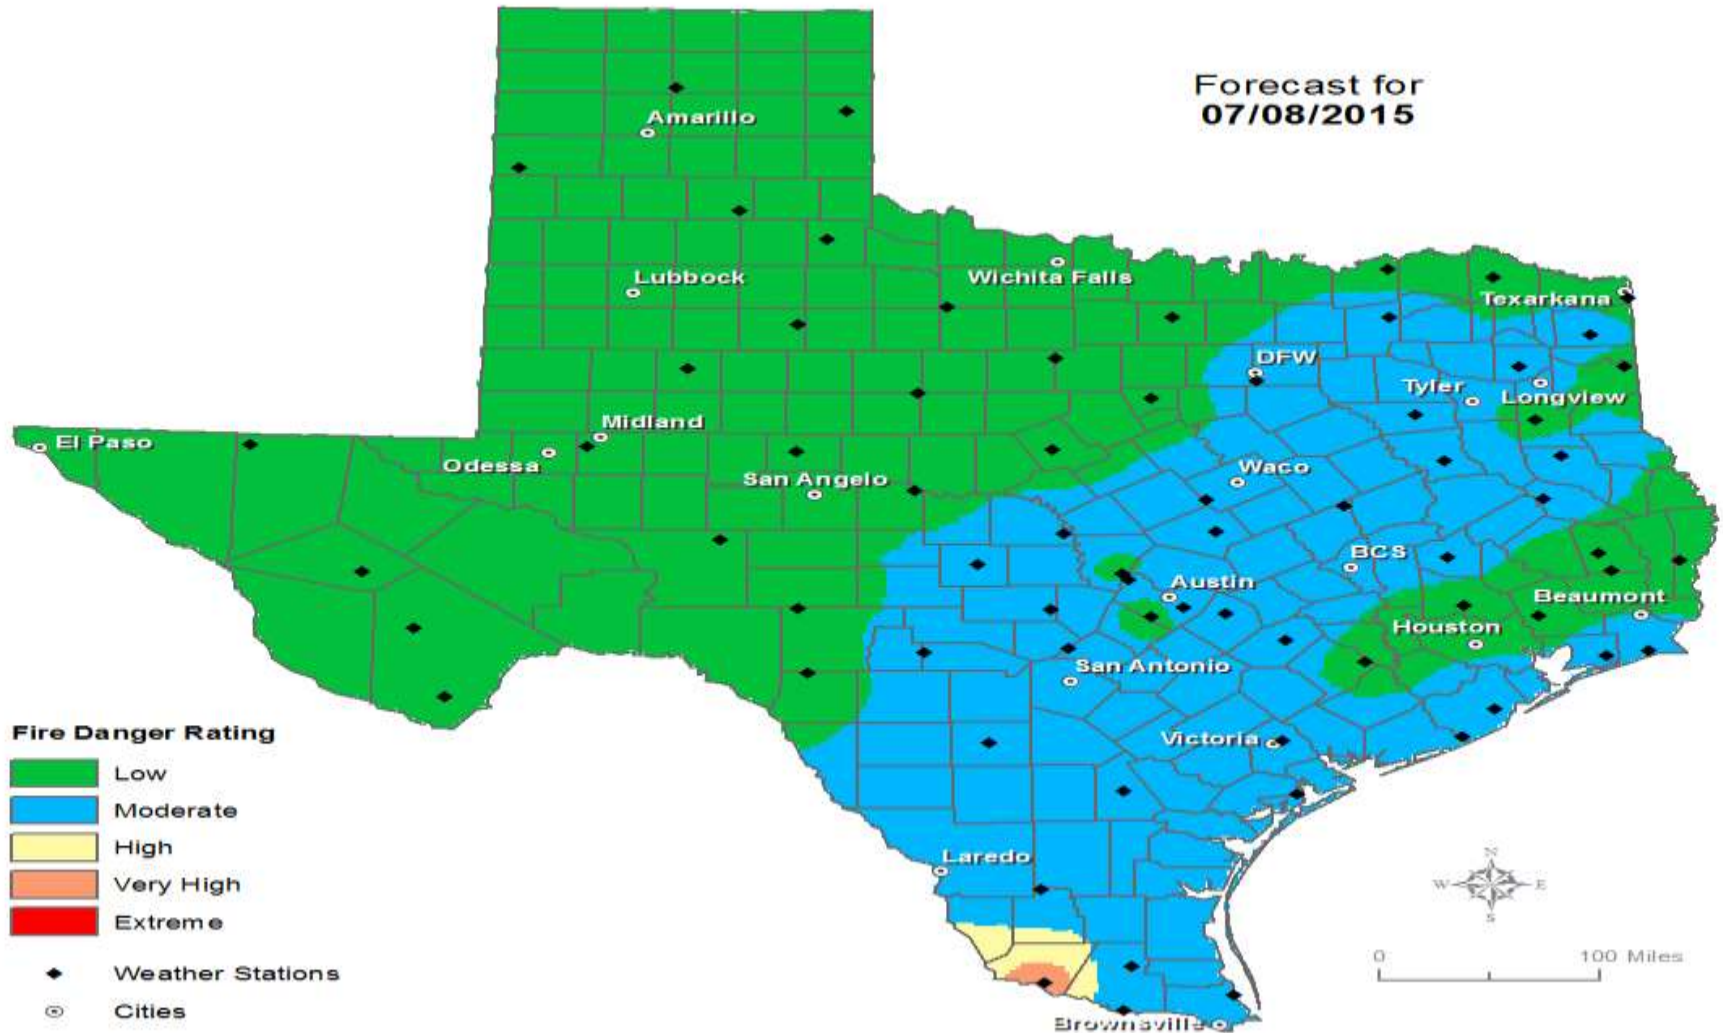

DATE	WARNING TYPE	LOCATION
07/07/15	Arroyo and Small Stream Flood Advisory	Coleman, Crockett, El Paso, Hudspeth, Runnels and Terrell Counties
07/07/15	Flood Advisory	Brewster, Jeff Davis, Pecos and Terrell Counties
07/07/15	Small Stream Flood Advisory	Edwards, Glasscock, Real, Reagan, Uvalde and Val Verde Counties
